In 2016, there were approximately 3,191 people living with HIV in Delaware. In 2017, 124 people were newly diagnosed with HIV. That is a rate of 396 people living with HIV per 100,000 people. *Data not shown to protect privacy because of a small number of cases and/or a small population. **State health department, per its HIV data re-release agreement with CDC, requested not to release data to AIDSVu. See Data Methods for more information. NOTE: There are no county-level maps for Alaska, District of Columbia, and Puerto Rico because there are no countries in these states.
